

Matthew R. Weir, M.D. is attending physician and Director of the Division of Nephrology in the Department of Medicine at the University of Maryland Hospital, Baltimore. He is also Professor of Medicine at the University of Maryland School of Medicine.

Dr. Weir's primary research interests include the use of antihypertensive therapy for the treatment of diabetic nephropathy, hypertensive renal injury in African Americans, cardiovascular disease in patients with chronic kidney disease, and mineralocorticoid receptor antagonism to treat atherosclerosis. He has written more than 600 manuscripts and book chapters about these topics. He has edited 8 books on topics in nephrology, transplantation, and hypertension. He has presented at numerous international scientific association meetings, hospitals, and medical schools.

Dr. Weir currently reviews manuscripts for more than 30 major medical journals, including the American Society of Nephrology, and Archives of Internal Medicine. He is on the editorial board of 18 journals and is Section Editor of Current Hypertension Reports and Current Opinion in Hypertension and Nephrology, and Associate Editor of Clinical Nephrology and the American Journal of Nephrology. He has 5 active NIH supported grants: three from NIDDK, and two from NHLBI. In addition, he is a member of numerous associations, including the American Society of Nephrology, the National Kidney Foundation, the American Heart Association, and the American Society of Transplantation.

Dr. Weir received his medical degree from the University of Virginia, Charlottesville. He completed his internship and residency programs in medicine at the Waterbury and Yale-New Haven Hospitals in Connecticut, and completed his nephrology training at the Brigham and Women's Hospital, Harvard Medical School, in Boston, Massachusetts. He then moved to then to the University of Maryland where he has been a full time faculty member since 1983.
